EDUCATION

B.Tech in Computer Science Engineering | Amity University, Noida *Sep 2022 – May 2026* | CGPA: 7.14
Relevant Coursework: OOP, DBMS, Operating Systems, Computer Networks, Software Engineering, Artificial Intelligence, Information Security

Class XII (Senior Secondary) | Mayo International School, Delhi *2022* | 71.4%
Class X (Secondary) | Delhi Public School, Indirapuram *2020* | 84.4%

TECHNICAL SKILLS

Languages: Python, SQL, HTML/CSS
Testing & Automation: Pytest, Postman (API Testing), Playwright, Manual Testing, Regression Testing, Test Case Design
Backend & Databases: Flask (REST), MySQL, RDBMS, MVC Architecture, JWT Authentication, JSON
Tools & CI/CD: Git, GitHub, Jenkins, VS Code, MySQL Workbench
Core Concepts: Data Structures & Algorithms (DSA), OOP, DBMS, SDLC

PROFESSIONAL EXPERIENCE

QA Automation Testing Engineer | HiPath Technologies Pvt. Ltd., Uttar Pradesh *June 2026 – Present*

- **Execute** manual and automated test cycles for enterprise web applications, building and maintaining UI automation suites with **Playwright (TypeScript/JavaScript)**, using precise **XPath and CSS locators** to ensure stable element targeting across HTML-based UI elements.
- **Perform** API testing with **Postman** across REST endpoints and conduct **database testing** against **Microsoft SQL Server** to validate XML/JSON responses and confirm backend data integrity.
- **Collaborate** with cross-functional teams via **Jira and Slack** to track defects, manage test cycles, and coordinate sprint schedules and release calendars, maintaining CI pipelines with **TeamCity and Git/GitHub**.

Software Testing Intern | Digicode Software Pvt. Ltd., Noida *April 2026 – June 2026*

- **Designed** and executed structured manual test cases and detailed bug reports for live enterprise features, establishing reliable baseline coverage across functional and regression suites.
- **Conducted** systematic API testing using **Postman** across GET, PUT, POST, and DELETE endpoints, verifying authentication flows and error handling to surface defects early in the development cycle.
- **Built Python + Pytest + Requests** automation scripts to transition the team from manual to automated API testing, **reducing regression execution time by over 99% — from 20 minutes to 3 seconds**.
- **Queried SQL** databases and cross-referenced **Google Sheets** to validate backend data against expected application state, ensuring end-to-end data integrity across test runs.

PROJECTS

Enterprise Human Resources & Payroll System | *Python, Pytest, Requests, Postman, SQL* *Staging*

- **Spearheaded** end-to-end testing for a high-complexity HR and payroll platform, replacing an entirely manual QA process with a structured, repeatable automated framework.
- **Architected** a **Pytest + Requests** test framework covering critical payroll calculation logic, employee CRUD operations, and JWT authentication endpoints.
- **Authored** automated scripts that fully replaced manual regression workload for core modules, **slashing execution time by over 99%** and improving defect detection consistency across builds.

CERTIFICATIONS

- **Generative AI Content Creation** | Adobe
- **Nasscom Digital 101 Journey** | NASSCOM
- **Basic Networking for CCNP Routing and Switching** | Cisco
- **Introduction to Packet Tracer** | Cisco Networking Academy
- **Marketing Specialist Specialization** | Coursera
